

# Table of Contents

<b>Preface</b>	<b>i</b>
<b>Introduction</b>	<b>1</b>
<b>1 General theory of waveguides</b>	<b>5</b>
1.1 Basic relations for regular waveguides . . . . .	6
1.1.1 Vector transmission-line equations . . . . .	7
1.1.2 Longitudinal and transverse fields . . . . .	8
1.2 Boundary conditions and waveguide modes in closed guides	9
1.2.1 Dirichlet and Neumann boundary conditions . . . . .	9
1.2.2 TE and TM modes . . . . .	10
1.2.3 Lossy waveguide walls. Hybrid modes . . . . .	13
1.2.4 TEM mode . . . . .	13
1.3 Orthogonality of the modal fields . . . . .	15
1.3.1 The proof . . . . .	15
1.4 Fundamental properties of open waveguides . . . . .	18
1.4.1 Boundary conditions for open waveguides . . . . .	19
1.4.2 Eigenwaves in planar dielectric waveguides . . . . .	20
1.5 Inhomogeneities in waveguides . . . . .	24
1.5.1 Transmission-line theory applied to waveguides . . . . .	24
1.5.2 Equivalent circuits for basic inhomogeneities . . . . .	25
1.6 Periodically inhomogeneous waveguides . . . . .	33
<b>2 Theory of high-frequency resonators</b>	<b>39</b>
2.1 Modes of closed and open resonators . . . . .	39
2.1.1 Eigensolutions . . . . .	39
2.1.2 Cylindrical resonators . . . . .	40
2.1.3 Mode orthogonality . . . . .	42
2.1.4 Losses in resonators. Quality factor . . . . .	43
2.2 Excitation of resonators . . . . .	44
2.2.1 Eigenfunction expansion . . . . .	44
2.2.2 Excitation of resonators as sections of waveguides . . . . .	46

<b>3</b>	<b>Waves in crystals and anisotropic waveguides</b>	<b>49</b>
3.1	Electromagnetic properties of anisotropic crystals. Reciprocity . . . . .	49
3.2	Electromagnetic waves in nonmagnetic crystals . . . . .	51
3.2.1	Plane waves. Poynting vector . . . . .	52
3.2.2	Eigenwaves in uniaxial crystals . . . . .	53
3.3	Waveguides with anisotropic fillings . . . . .	57
<b>4</b>	<b>Nonreciprocal media, waves in ferrite waveguides</b>	<b>63</b>
4.1	Properties of magnetized ferrites . . . . .	63
4.2	Longitudinal propagation. Faraday effect . . . . .	68
4.3	Transverse propagation . . . . .	72
4.3.1	Microstrip line on ferrite substrate. Isolator . . . . .	74
<b>5</b>	<b>Dielectric waveguides: classical methods for propagation constant calculations</b>	<b>79</b>
5.1	Marcatili's method . . . . .	80
5.1.1	Rectangular dielectric rod waveguide in air . . . . .	82
5.1.2	Some properties of rectangular dielectric waveguides . . . . .	83
5.1.3	How well does Marcatili's method work? . . . . .	84
5.2	Goell's method . . . . .	85
5.3	Open anisotropic waveguides . . . . .	87
5.3.1	Modification of Marcatili's method for the calculation of anisotropic rectangular dielectric waveguides . . . . .	87
5.3.2	Application of Goell's method for the calculation of anisotropic rectangular dielectric waveguides . . . . .	92
5.4	Comparison of modified Marcatili's and Goell's methods with experimental results . . . . .	95
<b>6</b>	<b>Fabrication and measurements</b>	<b>103</b>
6.1	Methods for material testing . . . . .	103
6.2	Open Fabri-Perot resonators for material testing in the millimeter-wave region . . . . .	104
6.2.1	Classical theory and its extensions . . . . .	106
6.3	Materials for millimeter-wave dielectric waveguides . . . . .	110
<b>7</b>	<b>Excitation of millimeter-wave dielectric waveguides: computer simulations and experiments</b>	<b>115</b>
7.1	Computer simulations with Finite Element Method . . . . .	117
7.1.1	Tapers of the dielectric waveguide . . . . .	117

7.1.2	Field distribution near the taper section . . . . .	130
7.2	Experimental measurements of dielectric waveguides . . .	135
7.2.1	Waveguide samples and the experimental setup . .	135
7.2.2	Sapphire dielectric rod waveguides . . . . .	136
7.2.3	GaAs dielectric waveguides . . . . .	140
7.2.4	Horn-like structure implementation . . . . .	144
7.2.5	Conclusions . . . . .	146
7.3	Some notes about metal waveguides . . . . .	146
<b>8</b>	<b>Dielectric waveguide devices and integrated circuits</b>	<b>149</b>
8.1	Dielectric waveguides for integrated circuits . . . . .	149
8.1.1	Non-radiative dielectric waveguide . . . . .	150
8.1.2	Dielectric waveguide circuits on metal and dielec- tric substrates . . . . .	151
8.2	Passive devices . . . . .	154
8.2.1	Whispering gallery resonator . . . . .	154
8.2.2	Directional couplers . . . . .	155
8.2.3	Phase shifters and attenuators . . . . .	157
8.2.4	Isolators and circulators . . . . .	160
8.3	Active devices . . . . .	160
8.3.1	Theory of electromagnetic wave propagation in bulk negative resistance media . . . . .	161
8.3.2	Experimental observations of millimeter-wave am- plification with active waveguides . . . . .	166
8.3.3	Slow electromagnetic wave amplification with drifting electrons in semiconductor waveguide structures . . . . .	168
8.4	Dielectric waveguide antennas . . . . .	170
8.4.1	Classification . . . . .	170
8.4.2	Dielectric rod antennas . . . . .	171
8.4.3	Leaky-wave antennas . . . . .	172
	<b>Appendix A: Dyadics</b>	<b>181</b>
	<b>Appendix B: Reciprocity theorem</b>	<b>185</b>
	<b>Appendix C: Description of Matlab programs</b>	<b>187</b>
	<b>Index</b>	<b>189</b>
